

# LARGE HEXAGONAL TABLE LAMP — W1005

BRONZE OR BURGUNDY, 1969

Created in the late 60s, this lamp was inspired by a stone model of the Dunbar collection designed by Edward J. Wormley in 1959. Jules Wabbes reinterpreted this classic model. The first copies made of travertine were produced by Mobilier Universel.

They were later made of metal and distributed by GENERAL DECORATION in 1969. The cotton lampshade is simply held by three notched metal rods.
