

# HONEYCOMB WALL LAMP

BRASS, 1953

The Honeycomb Wall Lamp is composed of 32 hexagonal tubes brazed by hand. This iconic lamp was designed in 1953 for the high entrance hall of the Declercq's house built by André Jacquain and Jules Wabbes. To ensure it could be seen from both below and above, Jules Wabbes designed a lamp made of soldered hexagonal tube sections, so that the light source is filtered from both sides by the metallic structure.

The Honeycomb Wall Lamp is a classic of our lamp range and is an exclusivity of GENERAL DECORATION. It decorated the apartment of the King and Queen of Belgium on the Godetia, the ship of the Belgian Navy.
